

	<b>FLORAFIL-93 LIQUID</b> <b>15 gr/kg</b>	<b>SPECIFICATIONS SHEET</b>	
		CODE: HE-ID-02	
		Rev: 00	Page 1 of 1

**DESCRIPTION:** Product made from the extract of Marigold meal (*Tagetes erecta*), stabilized with antioxidant and emulsified in water.

**PHYSICAL AND CHEMICAL CHARACTERISTICS**

Total Xanthophyll:	15 gr/kg minimum
% Solids:	10 to 15
pH:	10 to 13
% Saponification:	95 minimum
Density:	0.98 to 0.99 gr/c.c.
Viscosity:	15 to 35 cps to 25°C
Dispersion test in water:	Free of clots and suspended particles.

**RELATIVE PARTITION BY HIGH PERFORMANCE LIQUID CHROMATOGRAPHY**

Total Dihydroxypigments:	95 to 98 % (*)
Dihydroxylutein:	81 to 89 %
Dihydroxyzeaxanthin:	5 to 8 %
Total Monohydroxypigments:	1 to 3 % (*)
Monohydroxicryptoxanthin	0.5 to 4.5 %
Total Carotenes:	0.2 to 2 % (*)
Total Xanthophyll Esters:	0.2 to 0.5 % (')

(\*) Relative to Total Xanthophyll Content (A.O.A.C.)

**Uses:**

Used extensively in the poultry industry for pigmentation of skin and egg yolks. Useful in shrimp culture since *Litopenaeus* have the capacity of transforming lutein and zeaxanthin into astaxanthin. It may also be used in commercial fish feed or for coloration of ornamental fish.

**Shipping:**

Florafil 93 Liquid may be shipped in tank cars with 23 tons net weight, in plastic drums with 200 kg or in plastic carboys with 20 kg.
